# Zebra Printer Packing List

---

- Thermal Printer (1)

- Keypad (1)

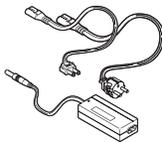

- Ribbon (1)

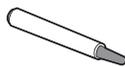

- Cardboard Ribbon Core (Retain for continuous use.)

- Power Supply and Cord

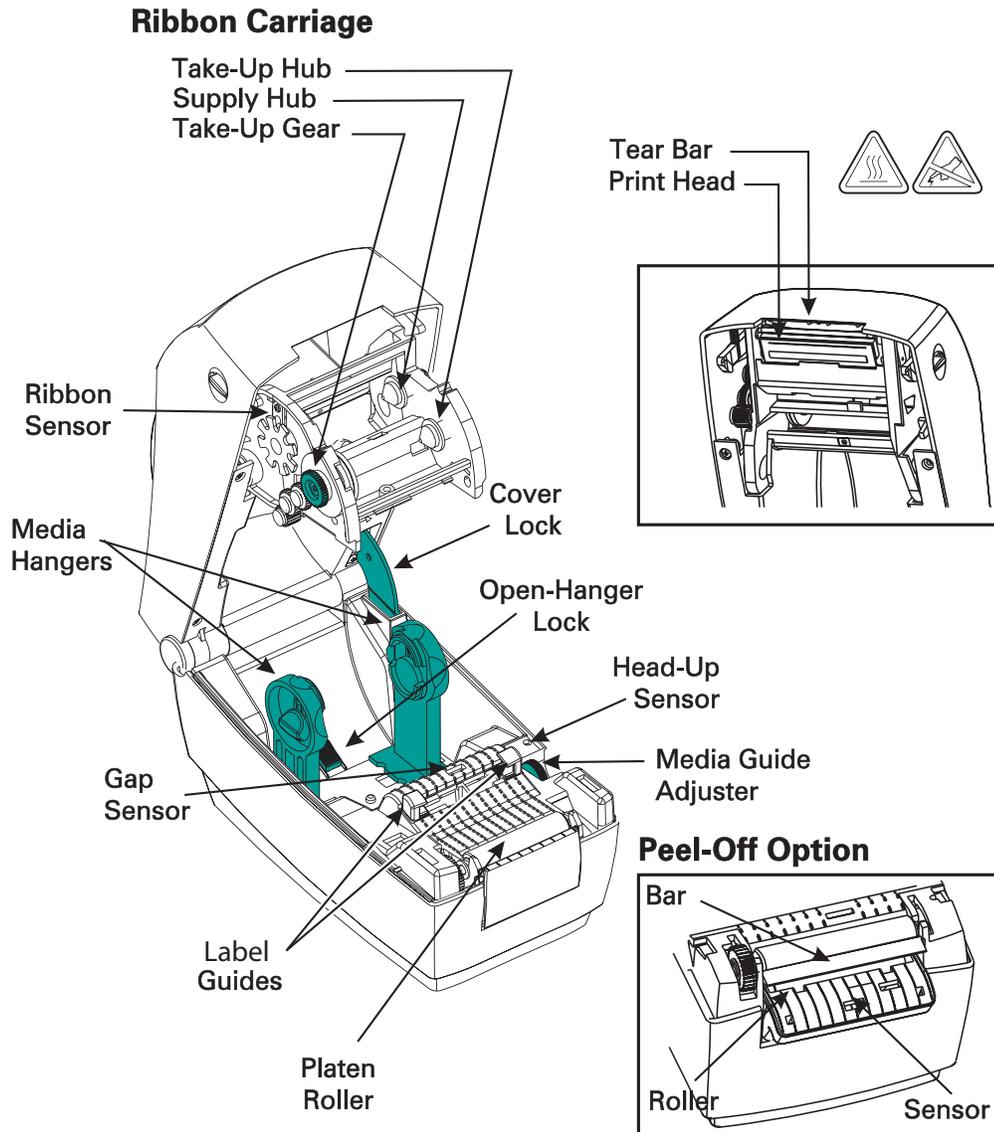

- Cleaning Pen

- Instructions

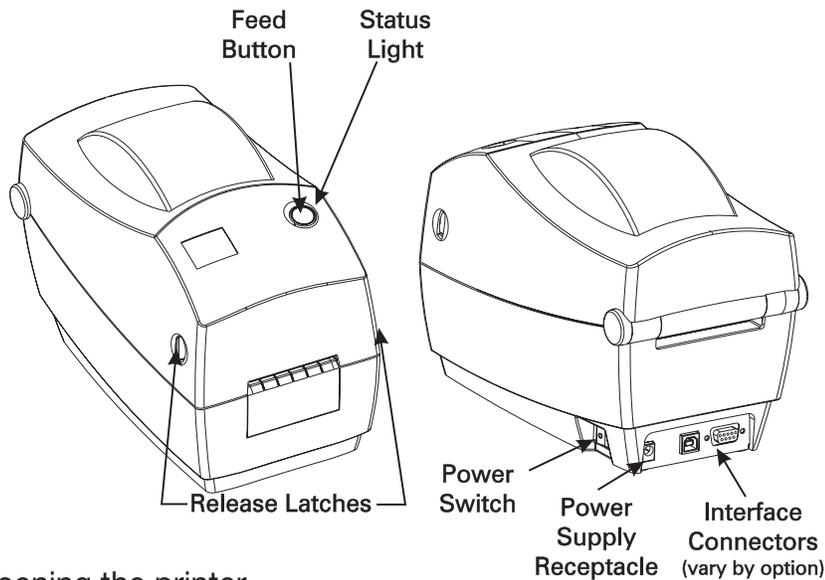

# Getting To Know Your New Zebra Printer

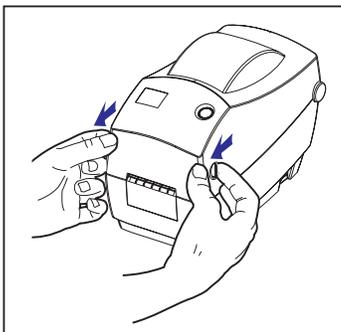

# Loading Labels:

1. Perform the AutoSense adjustment when loading a new roll of labels.
2. Open printer cover.
3. Open green label holder.
4. Load labels face up into holder and thread through the black label guides. Adjust label guide by using the green control wheel (on right). Do not over tighten since labels will not feed freely and properly. (See page 3.)
5. Once tightened, release cover and shut. Press the feed button on top of machine.

## Opening the printer

To access the media compartment, you must open the printer.

Pull the release levers towards you and lift the cover.

# Loading Ribbon:

---

See page 6 for diagram.

- Open printer cover. Pull ribbon carriage forward.
- Attach ribbon roll to spring load closest to back of printer. Make certain the **notches on the ribbon core and the notches on the machine are matching up together on the left side** (see next page). Continue to wrap ribbon under and up until sufficient ribbon is extended to reach the empty cardboard core in the front spring load.
- Attach adhesive end of ribbon to cardboard ribbon core. Load this roll in the spring load located in the front of the printer.
- Using the roll control (on left) turn clockwise until ribbon shows only black.
- Push print head back up into top of the cover and close cover.

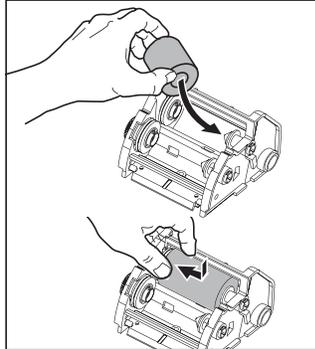

**Always retain the cardboard core since you will need it each time you replace your ribbon.**

**Please note that ribbons are not reusable!**

# Loading Ribbon continued...

## ① Install the ribbon supply roll.

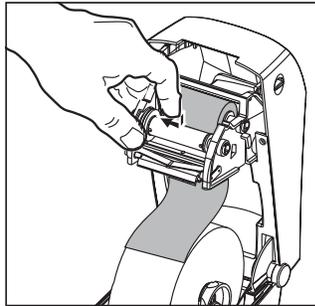

Before following these steps, prepare the ribbon by removing its wrapping and pulling its adhesive strip free.

1. Thread the ribbon through the carriage.
2. Press the right side onto the supply hub.
3. Align the notches on the left side and mount onto the spokes of the left hub.

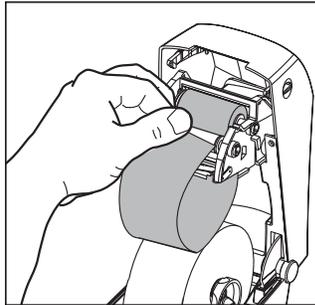

## ② Install the take-up roll.

You can find your first ribbon take-up core in the packing box. Subsequently, use the empty supply core to take up the next roll of ribbon.

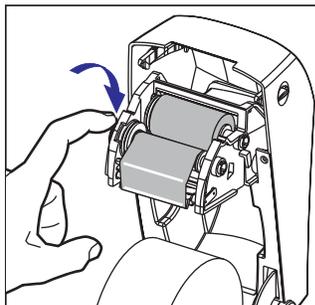

1. Press the right side onto the take-up hub.
2. Align the notches on the left side and mount onto the spokes of the left hub.

## ③ Attach the ribbon.

1. You must align the ribbon so that it will be taken straight onto the core.
2. Attach the ribbon to the take up core. Use the adhesive strip on new rolls; otherwise, use tape.

## ④ Tighten the ribbon.

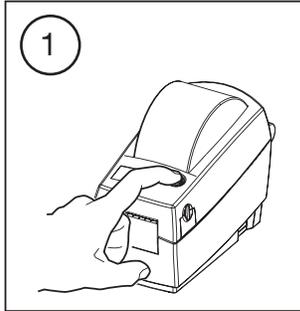

1. Turn the ribbon take-up gear counter-clockwise (top moves toward rear) to remove slack from the ribbon.
2. Close the top cover. Remember that you need to release the cover lock, lower the top cover, and press down until the latches snap into place.

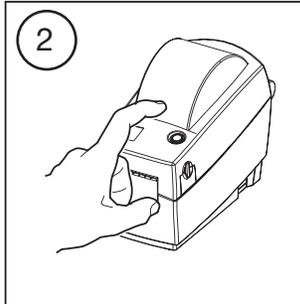

# Perform AutoSense Adjustment

- ① AutoSense Adjustment must be performed each time a new roll of labels or ribbon is loaded.

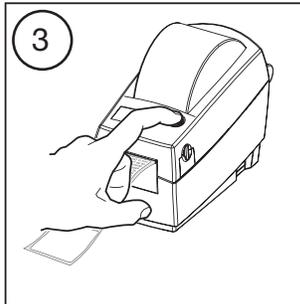

Make sure power is on and light is green.

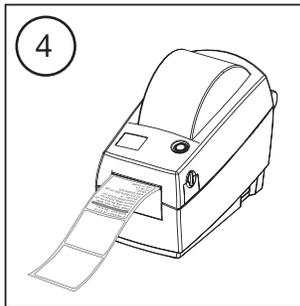

- ② Press & hold green button down while watching the light for flash sequence.

- ③ Green light will flash once then go solid. Then it will flash twice & go solid. Release button after it flashes twice.

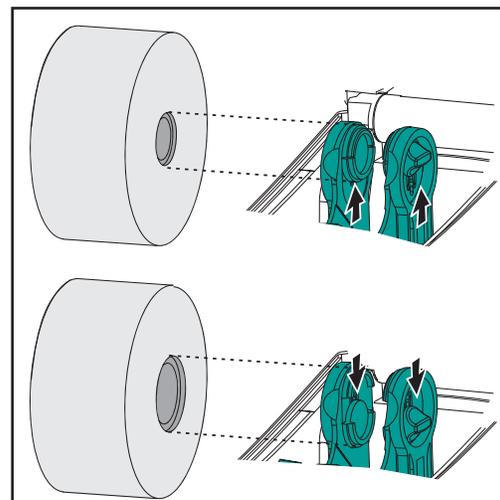

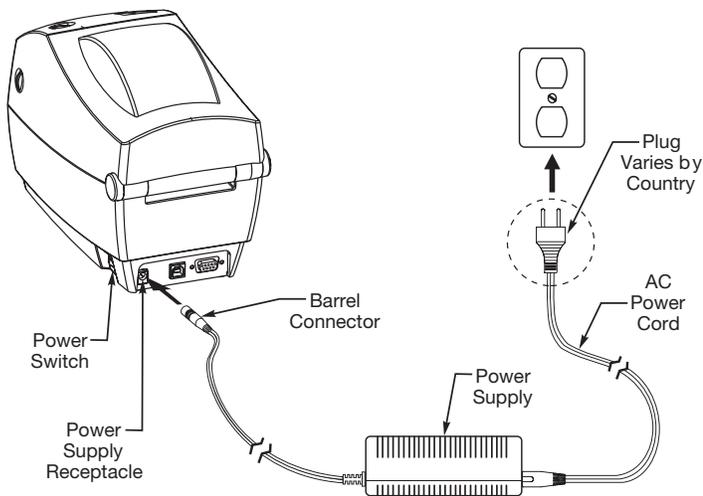

- ④ Note: Printer prints "out of DUMP"  
Power unit OFF and then ON. Then press Green button.

Unit will normally use 15 to 20 labels to complete the adjustment.

# How to Set Up the New System:

1. Plug power supply into power cord then into back of printer and into power outlet.
2. Plug keypad into back of printer and tighten screws securely.
3. Flip the ON/OFF power switch to the ON position. The switch is located on the right side near the back of the printer. A green light will appear when printer is ON. Never unplug the printer before turning the power switch to the OFF position.
4. Load Labels.
5. Check to make sure ribbon is fully in place and tight. It could loosen during shipping.
6. Run a test print by following directions on page 9. The first one or two labels will print out of alignment. The third label should print like the sample labels.

# Printing Labels Using The Keypad:

---

1. When the power is on and the keypad is plugged in, the keypad LED display will read:

**“FORM-RETRIEVE FORM F2-LIST FORM V2.8.”**

2. Press “Form” on your keypad and it will prompt you to “Enter Form Name.”
  - i. If using vertical/portrait format labels, the form names will be FP1-FP65 (see pages 19-22 for form descriptions and samples).
  - ii. If using horizontal/landscape style labels, the form names will be F1- F63 (see pages 15-18 for form descriptions and samples).
3. Enter Form name, then press ENTER.
4. The keypad will prompt you to enter different information depending on the form that you choose.
5. Follow the prompts and press ENTER after each entry.
6. The last entry will request the number of labels you want to print.
7. **NOTE: Enter “Date” once daily unless you change form name or shut printer off during the day. The date will print exactly how you type it in.**

# Troubleshooting

---

1. If the printer is utilizing multiple labels for one print request:
  - Open lid.
  - Pull six labels out of machine without tearing them off the roll.
  - Then peel the six labels off the liner.
  - Roll the remaining liner back on the roll of labels inside the printer.
  - Close machine.
  - Perform an AutoSense adjustment (see page 5 ).
  - Switch the printer power OFF then back ON.
  - Press the feed button.
  - The printer should now print one label at a time.
  
2. If the printer is still utilizing multiple labels for a single print request:
  - Switch printer power OFF, leaving the printer lid closed.
  - Perform an AutoSense adjustment without peeling labels off (See page 6).
  - Switch the printer power OFF then ON.
  - Press the feed button.
  - The printer should now print one label at a time.

NOTE: This procedure may need to be done as many as two additional times. If it still is not printing one label at a time call Customer Service Support at: (888) 307-5352

3. If the red light comes on after printing a label:
  - Make sure ribbon is in tight and notches on ribbon and machine are aligned.
  - Perform an AutoSense adjustment.
  
4. If keypad is reading “Form-retrieve form F2 – list forms v2.8” and will not respond:
  - Power machine off.
  - Unplug keypad.
  - Make sure the prongs are not bent.
  - Plug keypad in good and tight.
  - Power unit on and see if keypad works.
  - Repeat at least once and if it still does not work, call the Customer Service Support number at: (888) 307-5352.

# Pre-programmed Labels

*F=Horizontal format FP=Vertical format*

---

For all F / Horizontal formats please refer to pages 19-22

Select the form number that corresponds to the description of information you would like displayed to the customer. The system will prompt you to enter information in the proper fields. (I.e. date, mileage, oil grade, etc.)

- Forms FP1- FP13, FP15- FP22, and FP24-FP45 will automatically add 3,000 miles to the mileage entered.
- Forms FP14, FP21, FP23, and FP46-FP55 will display the mileage exactly as entered without adding any miles.
- Forms FP56-FP58 will automatically add 3,750 miles to the mileage entered.
- Forms FP59-FP61 will automatically add 5,000 miles to the mileage entered.
- FP62 Adds 3,000 Miles.
- FP63 Adds 3,750 Miles.
- FP64 Adds 5,000 Miles.
- FP65 No miles added.

## **OIL and LUBE**

<b>FORM</b>	<b>DESCRIPTION</b>
